The *Multidisciplinary & Health Education Journal (M&HEJ)* is an international journal, intended for the publication of original scientific articles, clinical case, short paper, research note, case report and review.

M&HEJ is an independent, on-line publication with an national and international editorial board. M&HEJ is open access with no cost to view or download articles and reasonable cost for publication of research articles, making M&HEJ easily available to scientists from resource restricted regions.

The Journal is intended to publish original contributions covering different aspects of:

- Ethical and legal aspect of the education.
- Legal aspects of health education, health economics and health administration.
- Educational reforms, equity, equality, inclusion and justice in health education.
- Education for health; safety, infection prevention, therapy and pharmacotherapeutic monitoring of infections, epidemiology of infections, health education (personal hygiene and health care), healthy eating, drug use and prevention of multi-drug microbial resistance, risk analysis and risk factors that favor the infection.
- The sciences of education and teaching (neurolearning, chronobiology, pedagogy, among others) that seek to describe, understand and prescribe educational policies and practices of the health sciences.
- Advances in biomedicine and biotechnology as technologies for health.
- Microbiology; basic, clinical (bacteriology, parasitology, mycology and virology), industrial (biotechnology), environmental, food, sanitary and agricultural.
- Food safety and food toxicology, science and technology.

Sometimes submitted manuscripts need Editorial improvements that require consultation between the authors and the editorial board. M&HEJ has a specialized editorial staff, the Area Coeditors Committee, to work with authors from developing countries to generate an article that meets international publication standards. This may include editing for English, reorganization of the manuscript, or even suggestions on experimental design. Working in an interactive manner, the Area Coeditors Committee and the authors, will be able to achieve not only a manuscript at international standards but also the exchange of ideas and methods for publishing in other international journals.

Editorial

The editorial team of *Multidisciplinary & Health Education Journal (M&HEJ)* Vol. 6 (num. 1): 2024, wants to express its gratitude to the CONACYT Scientific and Technological Research Fund for the support granted.

We welcome new members of the Editorial Committee and invited reviewers.

We thank readers for their interest in our magazine. We have observed a significant increase in the number of referrals and potential evaluators. Our index and databases that index our articles have also been increased, such as Google scholar, Google Books, DOAJ-Directory of Open Access Journals and ROAD-Directory of Open Access scholarly Resources.

We would like you to consider asking your universities or research centers to include the link to the open access journal M&HEJ so that you are constantly updated on the topics that interest you.

For the access and guarantee to health education that our developing nations require, M&HEJ continues to spread the science and technology of our researchers.

• Focus and scope

M&HEJ publishes national and international scientific contributions, in english and spanish, with the understanding that all submitted manuscript is original and unpublished. The evaluation of the scientific content and quality of the received manuscripts is under a double-blind strategy by at least two specialized referees, who can be from the journal's internal group, or external. The reviewing process is under complete anonymity.

The final editorial decision is made based on the recommendations of the peer reviewers, provided these recommendations are in accord without any strong dissenting opinions. Where there are dissenting or opposing views, the paper is assessed by a third reviewer who may or may not be a member of the journal's Editorial Board. Once all reviews have been received and considered by the editors, a final decision is made and a letter drafted to the corresponding author. Possible final decisions include:

- Acceptance without revision
- Acceptance subject to minor revision
- Resubmission for review after major revision
- Declined

Where there are issues with the standard of presentation or clarity of language, the authors will be informed accordingly and provided with suggestions or assistance for rectification.

The manuscripts or contributions are the product of original research or bibliographic reviews in the different areas of;

- Ethical and legal aspect of the education.
- Legal aspects of health education, health economics and health administration.
- Educational reforms, equity, equality, inclusion and justice in health education.
- Education for health; safety, infection prevention, therapy and pharmacotherapeutic monitoring of infections, epidemiology of infections, health education (personal hygiene and health care), healthy eating, drug use and prevention of multi-drug microbial resistance, risk analysis and risk factors that favor the infection.
- The sciences of education and teaching (neurolearning, chronobiology, pedagogy, among others) that seek to describe, understand and prescribe educational policies and practices of the health sciences.
- Advances in biomedicine and biotechnology as technologies for health.
- Microbiology; basic, clinical (bacteriology, parasitology, mycology and virology), industrial (biotechnology), environmental, food, sanitary and agricultural.
- Food safety and food toxicology, science and technology.

M&HEJ do NOT biographies.

M&HEJ's objective is to create a space for discussion and divulgation of results and advances of high-level original research. Consequently, the journal focuses on researchers or academics of each of the above-mentioned areas.

- Author Guidelines-

- **Cover letter**

All manuscripts submitted to M&HEJ must be accompanied by a letter stating that this manuscript is original, unpublished, not in press or posted elsewhere in English or any other language, and is not currently available. you are considering posting elsewhere.

Authors should suggest three potential unbiased reviewers (with email addresses) who are qualified to review their manuscript.

The submitted cover letter must declare that all authors have seen and approved the content of the manuscript and have contributed significantly to the work.

- **Type of articles**

Original Articles: An original article should be at least 2100 words long excluding references and title page.

Brief original articles (Short paper): The text for Brief Articles should not exceed a total of 2100 words, including an abstract (see below), references (not to exceed 30), figures (not more than 3), and tables (not to exceed 3). Subdivisions of sections are encouraged to help orient the reader.

Case reports: These should describe case diagnosis and investigations or treatments which are of exceptional interest, highlighting novel and important findings.

The **Mexican Academy of Health Education A.C. (AMESalud)** is a civil association made up of professionals and students from health disciplines. Hosts the *Multidisciplinary & Health Education Journal (M&HEJ)* as a strategy for academic dissemination and scientific research.

Mission: Bring together specialists in health education and students to strengthen this area, through socializing the relevance of this science in the well-being of the population, contributing as a consultative body in different social, professional, and governmental spheres, becoming a pillar of support for the professional performance of its members.

Vision: Become a professional association, with a national character and international recognition that collaborates with society at the different governmental, municipal, state and national levels, on issues related to health science.

Objectives:

- Promote health education and disseminate knowledge and its application through dissemination publications and conferences.
- Stimulate and maintain interest in basic and applied research in related health sciences in Mexico.
- Promote communication and cooperation of professionals and intellectuals immersed in the study, research and development of health education sciences.
- Contribute to the teaching of health sciences in the Mexican Republic, both at the basic levels, as well as in higher and higher education.
- Participate with proposals and join commissions with the three levels of government, in the diffusion and regulation of health, education for health and public health.
- Manage subsidies from the Federal Government, states and municipalities, to cover partially or totally the expenses that the works demand for the achievement of the objectives of the Association.
- Promote the linking of researchers with the Social and Industrial Sector through stays or student or professional internships, as well as in higher education institutions and research and development centers.
- Promote the participation of researchers in applied research projects that contribute to the resolution of the national public health problem.

Membership: Our commitment is to keep professionals and students in training updated in this constantly evolving area. If you are interested in being part of our community and accessing exclusive benefits, the first step is to obtain your membership. Join us and stay up to date with advances in health education.
