Journal

The Journal of Microbiology & Health Education (JM&HE) is an international journal, intended for the publication of original scientific articles, clinical case, short paper, research note, case report and review.

JM&HE is an independent, on-line publication with an national and international editorial board. JM&HE is open access with no cost to view or download articles and reasonable cost for publication of research articles, making JM&HE easily available to scientists from resource restricted regions.

The Journal is intended to publish original contributions covering different aspects of:

- Microbiology; basic, clinical (bacteriology, parasitology, mycology and virology), industrial (biotechnology), environmental, food, sanitary and agricultural
- Food safety and food toxicology, science and technology
- Education for health; safety, infection prevention, therapy and pharmacotherapeutic monitoring of infections, epidemiology of infections, health education (personal hygiene and health care), healthy eating, drug use and prevention of multi-drug microbial resistance, risk analysis and risk factors that favor the infection.

Sometimes submitted manuscripts need Editorial improvements that require consultation between the authors and the editorial board. JM&HE has a specialized editorial staff, the Area Coeditors Committee, to work with authors from developing countries to generate an article that meets international publication standards. This may include editing for English, reorganization of the manuscript, or even suggestions on experimental design. Working in an interactive manner, the Area Coeditors Committee and the authors, will be able to achieve not only a manuscript at international standards but also the exchange of ideas and methods for publishing in other international journals.

Editorial

The editorial team of *J. Microbiol. & Health Educ.* Vol. 3 (num. 1): 2021, wants to express its gratitude to the CONACYT Scientific and Technological Research Fund for the support granted.

We welcome new members of the Editorial Committee and invited reviewers.

We thank readers for their interest in our magazine. We have observed a significant increase in the number of referrals and potential evaluators. Our index and databases that index our articles have also been increased, such as Google scholar, Google Books, DOAJ-Directory of Open Access Journals and ROAD-Directory of Open Access scholarly Resources.

We would like you to consider asking your universities or research centers to include the link to the open access journal JM&HE so that you are constantly updated on the topics that interest you.

For the access and guarantee to health education that our developing nations require, JM&HE continues to spread the science and technology of our researchers.

- **Focus and scope**

JM&HE publishes national and international scientific contributions, in english and spanish, with the understanding that all submitted manuscript is original and unpublished. The evaluation of the scientific content and quality of the received manuscripts is under a double-blind strategy by at least two specialized referees, who can be from the journal's internal group, or external. The reviewing process is under complete anonymity.

The final editorial decision is made based on the recommendations of the peer reviewers, provided these recommendations are in accord without any strong dissenting opinions. Where there are dissenting or opposing views, the paper is assessed by a third reviewer who may or may not be a member of the journal's Editorial Board. Once all reviews have been received and considered by the editors, a final decision is made and a letter drafted to the corresponding author. Possible final decisions include:

- Acceptance without revision
- Acceptance subject to minor revision
- Resubmission for review after major revision
- Declined

Where there are issues with the standard of presentation or clarity of language, the authors will be informed accordingly and provided with suggestions or assistance for rectification.

The manuscripts or contributions are the product of original research or bibliographic reviews in the different areas of;

- Microbiology; basic, clinical (bacteriology, parasitology, mycology and virology), industrial (biotechnology), environmental, food, sanitary and agricultural
- Food safety and food toxicology, science and technology
- Education for health; safety, infection prevention, therapy and pharmacotherapeutic monitoring of infections, epidemiology of infections, health education (personal hygiene and health care), healthy eating, drug use and prevention of multi-drug microbial resistance, risk analysis and risk factors that favor the infection.

JM&HE do NOT publish technical reports, critics or opinions, biographies, etc.

JM&HE's objective is to create a space for discussion and divulgation of results and advances of high-level original research. Consequently, the journal focuses on researchers or academics of each of the above-mentioned areas.
